

SONANCE 

COMPACT CABINET SUBWOOFER

D8

Overview

The Sonance D8 features two powerful opposable 8" square drivers, wireless connectivity and our SONARC DSP technology all within a sleek ultra-compact cabinet.

D8

WIRELESS
TRANSMITTER

The 8" opposable drivers allow the small form factor to make a big impression. With built-in Counter Vibration Control maximum bass is achieved without the risk of movement from the D8.

With the addition of the optional Sonance Wireless Transmitter, the D8 placement becomes totally flexible. The transmitter range is 30' allowing the D8 to live anywhere in the room.

Download the SONARC App from the iOS App Store to enable a custom sound. Follow the simple step-by-step configuration to unlock 16 variable bands of equalization and enjoy the full potential of the D8 subwoofer.
