

SONANCE®

Degrees of Invisibility

Changing the way the world looks at audio.

**WHY LET ORDINARY
SPEAKERS TARNISH AN
EXTRAORDINARY ROOM?**

Sonance speakers preserve the integrity of your design.

Sonance believes there's more to exceptional speakers than sound alone. They must strike the perfect visual note as well. The shape, the size, the finish, and placement—every detail should be considered in the context of the room itself. The right choice not only complements your design, it becomes a part of the design, as deliberate and personal as the flooring below and the lighting above.

30 plus years after we invented the first in-wall speaker, Sonance continues to set the standard for premium loudspeakers, bridging the gap between aesthetic appeal and acoustic performance—and transforming the choice of speaker from an afterthought to an integral element of design.

SONANCE
INVISIBLE SERIES

Sonance Invisible Series systems and speakers vanish into room designs, delivering ambient music that emanates from walls and ceilings—everywhere and nowhere at once.

Creating consistency and balance

Pairing speakers with lighting is the best way to create visual consistency in the space.

Match the aesthetic

Suit every aesthetic, by selecting speakers that are the same shape, size, and installation profile.

Even coverage

Just as you have several lights across your ceiling to achieve consistent light levels, the same principle applies to your speakers.

The traditional approach

With only two speakers in a room you have uneven volume levels ... too loud under the speakers and too quiet away from them.

Uneven sound levels will compromise the atmosphere in your room resulting in "hot spots"

Even coverage

Just as you have several lights across your ceiling to achieve consistent light levels, the same principal applies to your speakers.

A case for systems

By using several smaller satellite speakers and hidden subwoofers you will not only enjoy perfectly even sound coverage throughout the room, it will also be less visually noticeable.

Everyone enjoys the perfect audio level, no matter where they are in the room. The combination of dedicated subwoofers with a small opening consistent with the satellite speakers ensure rich sound throughout the space.

The end result

Throughout any home you will find a combination of large open areas and smaller enclosed areas. To achieve the desired audio performance in each room, a mix of speaker systems and speaker pairs complement each other creating an ideal solution throughout the home.

Sound good in any room

DSP amplifiers complete every system by offering digital signal processing to optimize the performance of Sonance Systems and Speakers and to help correct for a room's shape, size, and furnishings. This ensures audiophile clarity in every room.
