

The Ivalo Collection

Smart customers. Smart choices.

Smart design marries creative vision with progressive technology. Guided by this principle, Ivalo products aim to be functional, high-quality aesthetic solutions for every type of inhabitable space.

Form and function

Ivalo fixtures are designed as architectural elements that are solutions to design problems. Each dimension and aspect of the form—including the canopy—is carefully considered.

Quality and service

Ivalo products are assembled in America with exceptional attention to detail (see page 4), and with our available quick-ship program can be delivered in two weeks.

For showrooms, representatives, and sales see our website at lutron.com/ivalo, or give us a call at 610.282.7472.

Value

Ivalo fixtures can enliven your space for a fraction of the cost per square foot of other modernist architectural elements, such as:

The Ivalo Collection

Extraordinary attention to detail

Power and structural cable

Perfectly formed corners

No mounting hardware

Precision machined edges

No weld marks

Premium automotive finishes

Above: Daedalus pendant with Matte Titanium finish at Klein residence, San Francisco, CA (see pg. 14)

Ivalo's LED collection

All families are available with LED-powered pendants and/or sconces

Ivalo's LED fixtures are compelling architectural forms that consume a fraction of the wattage used by traditional light sources. Aliante, Rotare and Lale families is standard with high quality 95 CRI (typical) LED's while Silvus and Inflection are available in various LED colors (white, amber, red, green, and blue).

4' LED sconce (see pgs. 8 & 10)

Top: L'ale LED pendant (See pg. 19)
Bottom: Rotare LED pendant (See pg. 23)

The Aliante family

Designed by
Stefano Casciani

An elegant nautically inspired minimalist form that harmonizes with most architectural styles. The Aliante family includes pendants and sconces in a variety of sizes and finishes, for indoor and outdoor use.

Aliante pendants

4' and 5' long with direct/indirect or indirect light only, suspended by Ivalo's i-wire power cable. For use in ballrooms, private offices, over conference room tables, reception desks, dining tables, and kitchen islands.

Above: Aliante 4' LED pendants, *top*: Clear Anodized with clear grille; *bottom*: Black Anodized

Above: Aliante 4' LED pendants, *top*: Lapis automotive paint with frosted grille; *bottom*: Clear Anodized

FOR
OUTDOOR USE

Aliante exterior/interior sconces

4' and 5' long, available in direct/indirect and indirect light only. For interior use in lobby spaces and for interior or exterior use between windows, flanking doors, and on columns.

Above: 4' and 5' indirect and direct/indirect interior LED sconces with Matte Titanium finish

Aliante
exterior/interior demi sconces

21" long, available direct/indirect and indirect light only; and 27" long, indirect only. For use on any wall, flanking doors and elevators, between windows, and on columns.

Daedalus

Designed by Audi Design
Center, California

The fixture is organized around two delicate curving lines described by the ribs of the central helix. The feathery quality of the glass blades inspired the name: Daedalus.

Daedalus pendant

5' long with a 17" wide glass-and-aluminum helical structure, direct light, suspended by aircraft cable from a 22" wide disk. Designed for use in ballrooms, lobbies, atriums, reception areas, galleries, and restaurants.

Above: Daedalus pendant with
Matte Titanium finish

Inflection

Designed by
Winka Dubbeldam

Inflection is a compelling form for spaces of encounter—lobbies, foyers, restaurants, reception areas, and retail spaces—which can be used alone or in sculptural combinations, depending on the scale and intensity of the room.

Inflection
interior sconce

23" long, indirect light only, sculptural form for use singly or in clusters. For use in ballrooms, lobbies, atriums, foyers, conference rooms, and reception areas.

2007
CHICAGO
ATHENAEUM GOOD
DESIGN AWARD

The L'ale family

Designed by
William Pedersen

L'ale began with the evocative gesture of two hands held wide open. It was designed to be hung singly or in multiples at uniform height, creating the spatial intimacy of a room within a room—winged elements animating space.

L'ale
pendant

4' 8" long, direct/indirect light, suspended by Ivalo's i-wire power cable. Designed for use singly or in multiples at the same or varying heights in ballrooms, lobbies, atriums, private offices, and over conference room tables and reception desks.

2013
ADEX AWARD
FOR DESIGN
EXCELLENCE

L'ale
interior sconce

27" long, direct/indirect light only. For use on walls,
flanking doors, and between windows and elevators.

Above: L'ale LED sconces
with Matte Slate finish

The Rotare family

Designed by
Lewis.Tsurumaki.Lewis

The sculptural form, created by rotating ruled surfaces that sweep from a vertical at the ends to a horizontal in the center, makes for a dynamic element that changes its appearance when viewed from different angles.

Rotare pendant

4' 4" long, direct/indirect light, suspended by Ivalo's i-wire power cable. For use over conference room tables, reception desks, private offices, and lobbies.

Above: Rotare LED sconces with Matte Titanium finish

Rotare
interior sconce

4' long, indirect light only, which functions as a cove light with a dynamic form that is mounted at a lower height than the ceiling. For use in lobbies and private offices.

Above: Rotare LED sconce with Gloss Titanium finish.
With junction box cover panel, *top*; and without, *bottom*

The Silvus family

Designed by
Roger Duffy

Inspired by the optical effects of water and light in the forest, Silvus evokes the gentle motion of water across foliage and the qualities of light filtered through the forest canopy.

Silvus24, Silvus30
 exterior/interior sconce

24" or 30" tall, direct/indirect light for use indoors or outdoors. Can be used in a wide range of applications—single unit, group, or field.

Above left: Silvus24 exterior/interior sconce in 1, 2, and 3-unit high configurations. *Above right:* Silvus30 interior/exterior

sconce in 1, 2, and 3-unit high configurations. LED: various colors created from RGB LEDs.
