High-Performance LED

Finiré Model	Standard	Warm Dimming
CRI (Typical)	95, R9=85	95, R9=85
Lumens (Delivered)	650-1750	800
Wattage	15	15
Efficacy (Lumens/Watt)	38-65	50

Independent measurement of typical 3000K downlight fixture models by Lutron Electronics Co., Inc. for reference only. See the Finiré 3" specification sheets for LM79 photometric data by fixture type and trim options.

Lens & Finish Options for Every Ceiling Type

Lens

Micro Prism Solite™	Frosted Glass	Wall Wash	No Lens

Note: All lens and finish options (except no lens) are wet (damp) location rated for covered, ceiling mount interior or exterior applications.

Finish

Matte White*	Matte Black*	Silver*	Bronze*	Silver/White**	Clear Anodized/White**	Clear Chrome/White**	Black Chrome/White**

*Matte White, Matte Black, Silver and Bronze are coordinated color finishes to match Finiré Prime and Ketra D3 downlights.

**White flange standard with flanged trims

Housings

IC housing

Non-IC housing

Note: Specification and install made easy with the adjustable housing options allowing field changeable beam spreads and the ability to convert from adjustable to wall wash and fixed downlight or standard trims to flangeless (mud-in) or pin hole options after wiring & ceiling install.

Field Changeable Beam Angles

* 15° not field changeable or available in warm dimming options

High-Performance 0.1% or 1% Dimming

Highest-quality dimming and 90+ CRI LED light performance fixture that comes standard with 2-wire 1% or new HomeWorks 0.1% digital controllers with guaranteed flicker-free dimming via Lutron controls. Backed by 24/7 customer-first service and support.

Intelligent and Digitally Addressable

HomeWorks digital technology allows you to individually address each fixture, letting you easily reconfigure lighting zones to accommodate changes in space (like rearranged furniture) without rewiring. This feature provides a soft, incandescent-like transition between 0.1% and off.

Static White and Warm Dim Options

Choose traditional 2700K, 3000K or 3500K white LED colors or warm dimming if you have a preference for lighting that shifts to a warm amber color as it dims. This feature is difficult to render naturally, but Finiré's warm dimming coupled with the 0.1% Soft-on, Fade-to-Black technology offers an incandescent-like experience that dims smoothly from 2700K or 3000K down to 1800K.

Ultimate Flexibility

To reduce your risk and maximize flexibility, choose the Finiré 3" fixture, which can be converted to a downlight, adjustable, wall wash or flangeless fixture after the housing is installed.

Custom Specification Grade

Finiré was designed for high-end residential applications customizable for any luxury experience. Models available for every ceiling type including exterior deck, flangeless wood & drywall. Various trim types and color finishes available.

Finiré 3"

Customizable spec grade downlight with multiple LED and trim colors ideal for residential applications.

The Lutron Warm Dimming Experience

Warm dimming delivers the experience of incandescent lighting, but with the benefits of LEDs.

* 2700K high end is also an option
