

Surge Protection

Power

Breaker Panels

TPX-1S240-F-100 \$970

Utility power was designed for motors and incandescent bulbs and does not guarantee clean power for electronics. TPD surge protection for breaker panels will extend the life of all electronics while improving their reliability.

Landscape Lighting

TK-LT120-20A-DIN2 \$370

TPD surge protection protects against harmful transient voltages that enter the structure and damage dimming modules and lighting systems that share a pathway.

Data

Cable Systems

TPD-Cable \$100

TPD provides surge protection for cable feeds entering the building before they are distributed throughout the building. Protection creates an equal potential ground eliminating ground loop problems.

Outdoor Speakers

TPD-Amp Pro-250 \$190

Transient Protection Design protects amplifiers by surge protecting the wire pathways that are driving outdoor speakers. Installing the TPD-AmpPro will reduce damage caused by surges that enter these pathways and destroy amplifiers and receivers.

Security Systems

TPD-CAT6-POE \$190

When it comes to protecting IP camera pathways it's best to make sure that the network switch that is feeding the outdoor cameras is protected.

Lighting Control

TPD-24LIT4 \$190

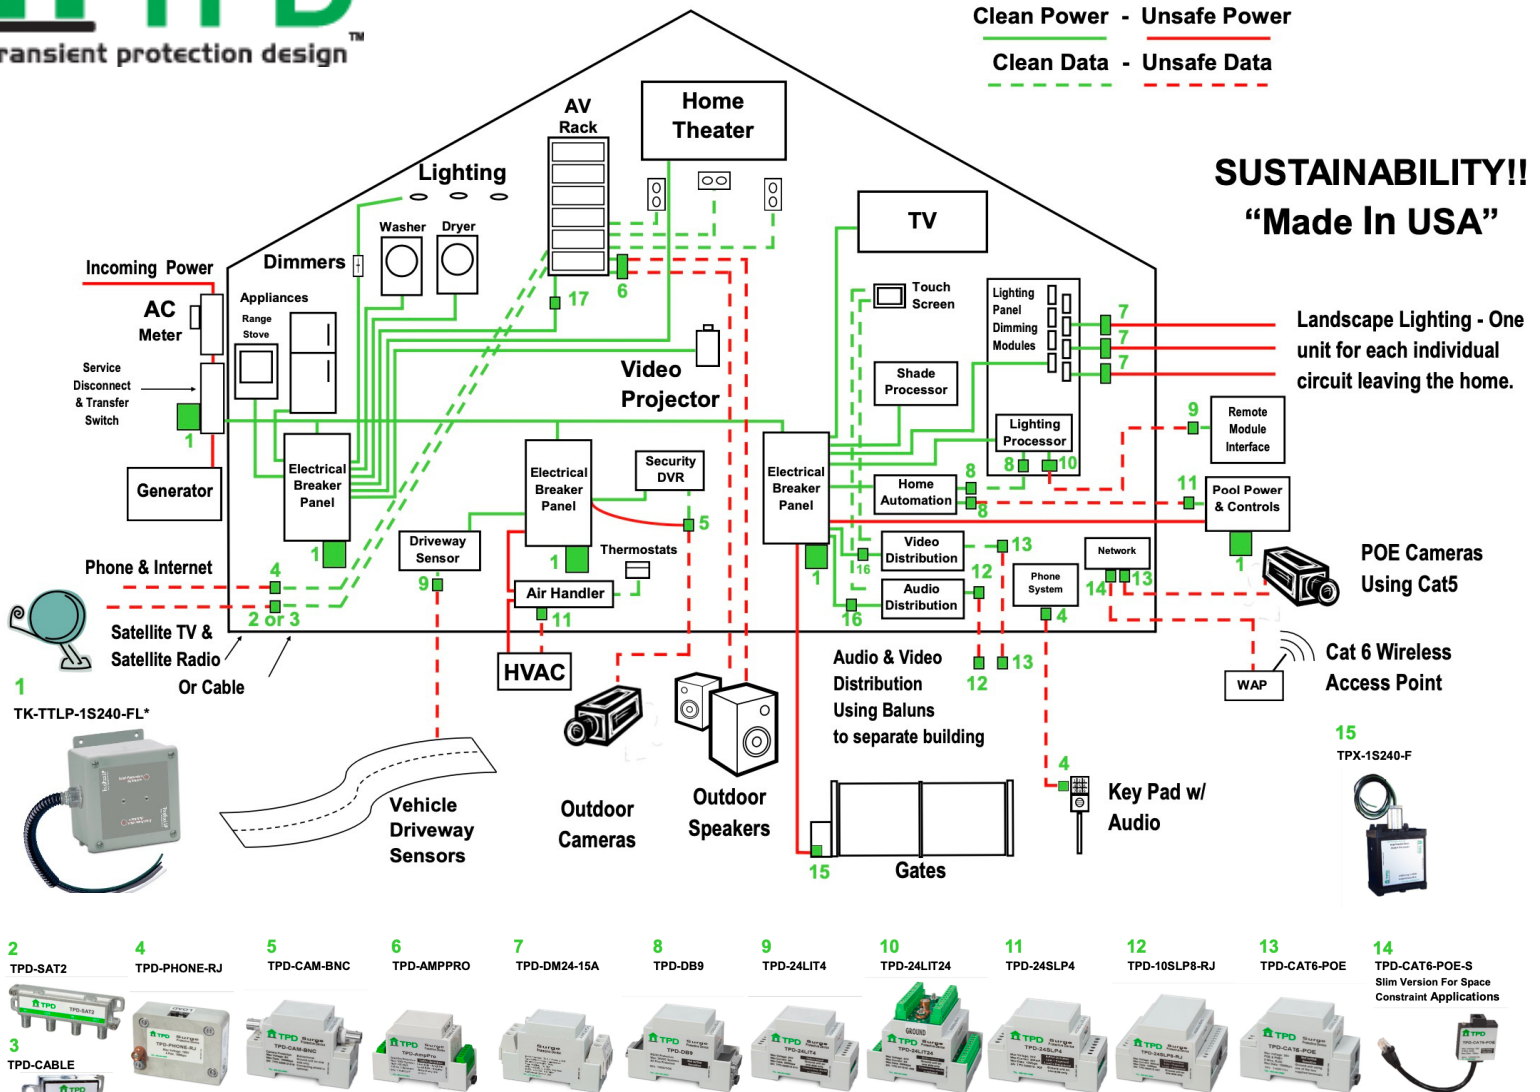

When left unprotected, low voltage control wires between systems are pathways for surge events to enter and leave the system traveling to other equipment. Protect lighting system keypad and communication lines by using the TPD-LIT series on copper pathways entering or leaving the facility.

Clean Power - Unsafe Power

Clean Data - Unsafe Data
