

Sonos Voice Control

Now your clients can control Lutron lights and shades with Sonos Voice Control. One "Hey Sonos" and the room responds. No extra setup. No privacy trade-off.

Choose your control: Lutron app · Keypads · Pico Audio remote · and now **Sonos Voice Control**.

Light Control

Turn them on and off. Adjust the brightness and color.

Shade Control

Ask to raise, lower, or tilt shades.

Audio Control

Play, pause, skip, adjust the volume, and move music around your home.

Set Scenes

One command like "Hey Sonos, movie night" dims the lights, drops the shades, and pauses the music.

Why Dealers Love This Integration

1 App

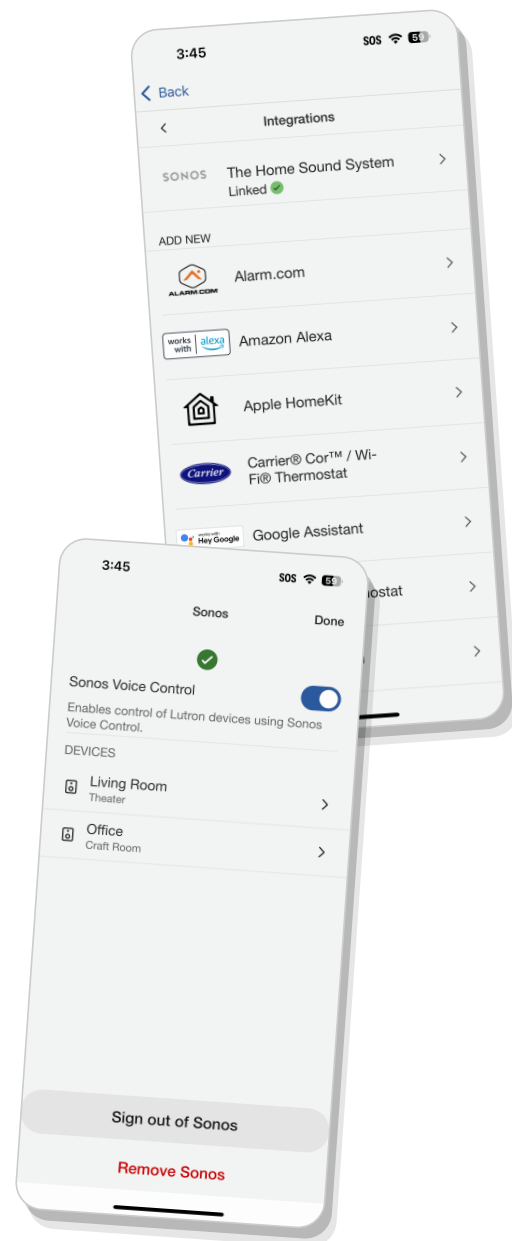

The Lutron app your clients already use. Now with voice control for audio.

60–65%

Typical blended gross margin on Lutron projects.

Hands-Free

Voice control opens the door to more clients and more use cases.

Available globally on Sonos devices with a microphone.

Setup is initiated in the Lutron app.
